**Application Areas:**

- Casting of roof slabs, DPC, beams, columns, water tanks, culverts, tunnels, sewerage works etc.
- Excellent for internal and external plaster of buildings etc.
- Repairs
- Compatible with all varieties of Portland Cement including Slag Cement
- To be added to gauging water before adding to the mix
- Rebound loss is very low
- Required at a very small dosage, hence convenient to handle and greater economy
- Improves water tightness to a great extent
- Improves workability without increased water content
- Acts to disrupt the leakage causing capillary structures formed in concrete to cause leakages
- No added chloride

**Dosage:**  
• 200 gm for two 50 kg bags of cement

Available Pack Sizes: 200gm / 1 kg / 5kg / 10kg / 20kg

### Sika® Latex Power

SBR based multipurpose polymer for waterproofing and repair.

**Application Areas:**

- For waterproofing of roof slabs, sunken slabs, basements, water tanks, sunshades etc. in combination with cement
- As a bonding agent for uses in repair and plastering
- For making polymer mortar for repairs mortars etc.
- Treatment for leaching and salt petre action
- Multipurpose mortar admixture for injection grouts

**Features:**

- Improves elasticity, flexibility, tensile strength of cement and reduces cracking
- Makes the mortar waterproof and reduces susceptibility to acids and gases, salt petre action etc.
- Mortar with Sika® Latex Power / Sika® SBR 100 shows extremely good bonding to bases like concrete, stone, brick etc.
- Reduces viscosity of cement injection grout and improves bond of cured injected materials with substrates
- Sika Latex Power can be diluted with water (1 : 4 - 6) and Sika SBR 100 can be diluted with water (1 : 4 - 8) depending on the type of application

**Coverage:**

- Approx. 10-15% by weight of cement depending on nature of work.

**Application Areas:**

- Waterproofing of roof slabs, sunken slabs, basements, water tanks, sunshades etc. in combination with cement
- As a bonding agent for uses in repair and plastering
- For making polymer mortar for repairs mortars etc.
- Treatment for leaching and salt petre action
- Multipurpose mortar admixture for injection grouts
- Additive to cement based paints for waterproofing

**Features:**

- Ensures low water: cement ratio.
- Improved impermeability against water ingress.
- Extremely good bonding to moist substrates, extremely improved mechanical, flexural strength and abrasion resistance properties.
- UV resistant & suitable for external coating
- When used as an additive to cement based paint improves impermeability, water repellency and anti-fungal property of the painted surface (oil trials are always advised before application for shade variations, if any).
- Sika Raintite I can be diluted with water (1 : Nil to 1 : 2) depending on the type of application

**Coverage:**

- As 10-20% by weight of cement depending on the nature of application.
