Transforming Learning Environments

EDUTONES

Transforming Learning Environments

Welcome to Asian Paints, India's biggest and one of the world's largest brands in paints and painting. From large-scale painting projects to colour consultancy and customisation, we have a wide range of products and services designed to cater to every need.

The Asian Paints Edutones colour guide has been specially put together to realise your vision for learning environments. It can help you arrive at the right blend of aesthetics and functionality, to create a positive atmosphere that aids learning.

Read up on how colour influences how we connect to and navigate our world. Get inspired by the wonderful themes and

schemes across a variety of spaces within a learning environment. Choose from a wide range of expert-recommended colour combinations, or create your own. Used intelligently, colour can create a system of order and help to distinguish important elements in the environment.

For information on Asian Paints products and services, call us at 1800 209 5678, or email info@asianpaints.com. You could also contact Asian Paints Project Sales or ColourPro representative to know more.

Let us help you achieve your vision for an iconic learning environment.

Chapter I

The Impact of Colour on Learning: Theories and Themes

Colours help children express themselves. They directly affect how creative and efficient teachers are in the classroom. They have the ability to instantly convey meanings and messages. Specific colours influence the health, morale, emotions, behaviour and performance of learners.

Get inspired by the range of specially-curated themes and moods in the pages that follow. Harness the power of colour and paint to create an interesting and exciting learning environment. A space that children and teachers look forward to engaging in, day after day.

The Impact of Colour on Learning: Theories

Colour & Age

Colour supports a child's development. Sensitivity to each age group's different responses to colour is key in creating an environment stimulating to their educational experience.

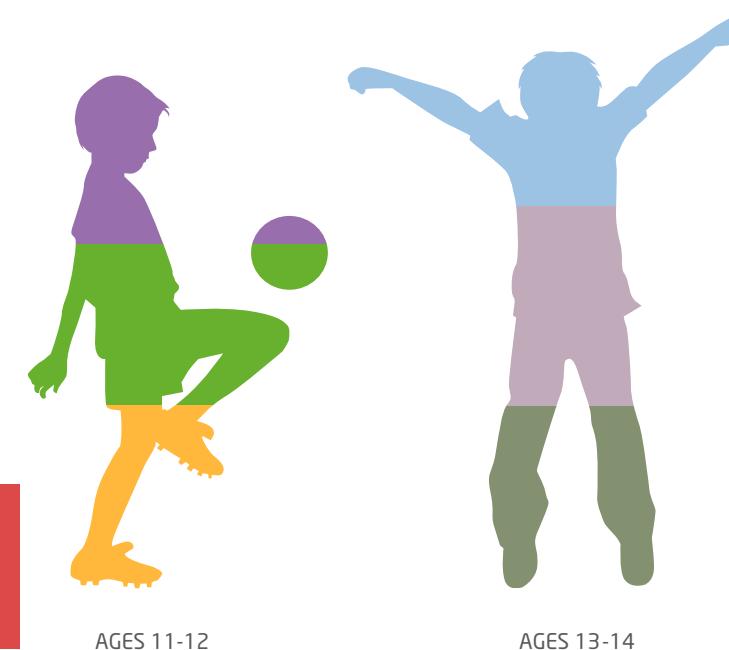

Children's rejection or acceptance of certain colours is a mirror of their development into adulthood: Younger children find high contrast and bright colours stimulating with a growing inclination for colours that

create patterns. Once students transition into adolescence, cooler colours and more subdued hues provide enough stimulation to them without distraction.

AGES 5-8

AGES 9-10

AGES 11-12

AGES 13-14

Colours and patterns affect the entire Central Nervous System. They alter alpha brain wave activity, and influence our moods, mental clarity and energy levels.

The colour preferences are graphical representations.

Colour & Light

Colour is a psychological phenomenon; an interpretation by our brains of the sensations of reflected light. Everyday objects are themselves not coloured; they only appear so because they reflect light from a particular wavelength on the visible spectrum.

Everything around us absorbs wavelengths from the illuminating white and reflects the rest, which creates the sensation of colour. Colour and light have medical, therapeutic implications. End wall treatments in a classroom can reduce eye-strain by helping

the eye relax as students look up from a task. The use of colour and graphics to aid way-finding is particularly important for Primary school children. Colour can create a system of order and help to distinguish important and unimportant elements in the environment.

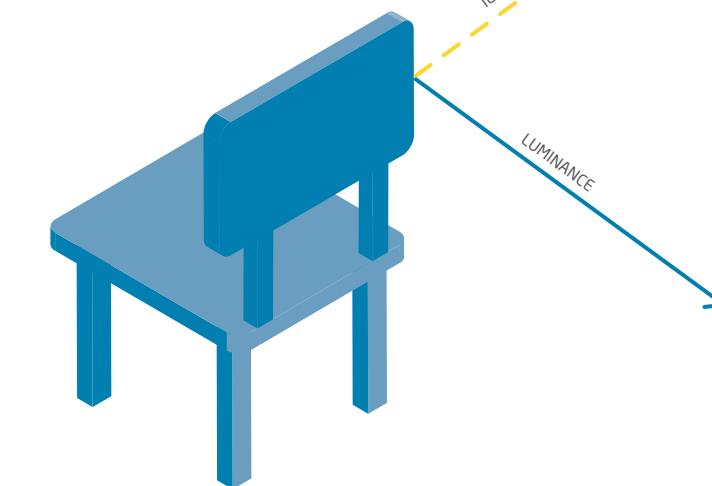

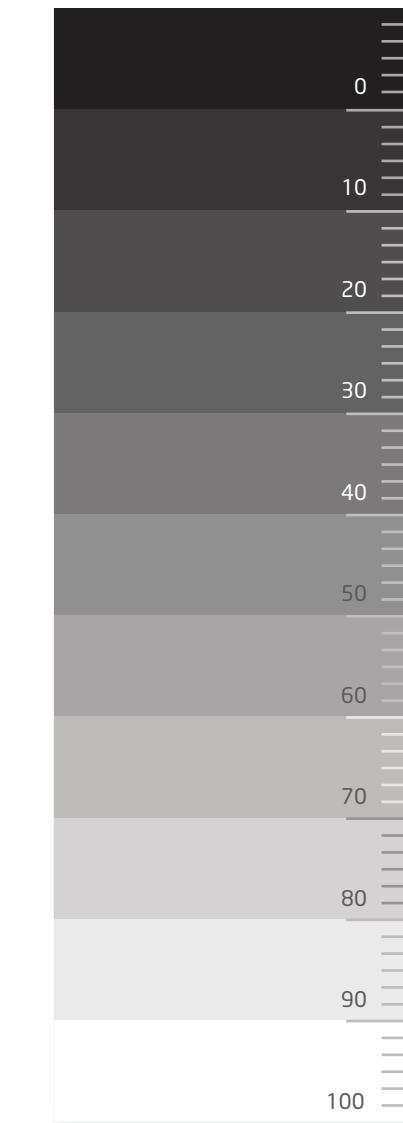

Light Reflectance Value (LRV)

Light Reflectance Value or LRV is an internationally standardised measurement that tells you how much light a colour reflects, and how much it absorbs. It is an objective and easy way to compare colours.

For sustainability, a wall colour with a higher LRV supports lighting plans by propagating daylight deep into the space. This reduces the number of fixtures needed to enable efficient and safe performance.

LRV Scale: Pure Black, with an LRV of 0, absorbs all light. However, Pure White with an LRV of nearly 100, can reflect all the incident light.

LRV VALUES: LIGHT AND DARK COLOURS

Light Colours: The colours below have a high LRV of 79-80, though they come from different colour families.

Impact of Colour on Learning: Themes

Asian Paints has evolved five themes based on the colour theories previously discussed. These themes explore how colour can be combined and applied in the learning environment, specific to age groups and the purposes of different spaces.

The thoughtful implementation of these themes will influence how children of varying ages and educators engage in the learning process.

Vivid & Responsive
Playful & Energetic
Fresh & Fun
Earthy & Orderly
Calm & Reflective

How to apply these themes:

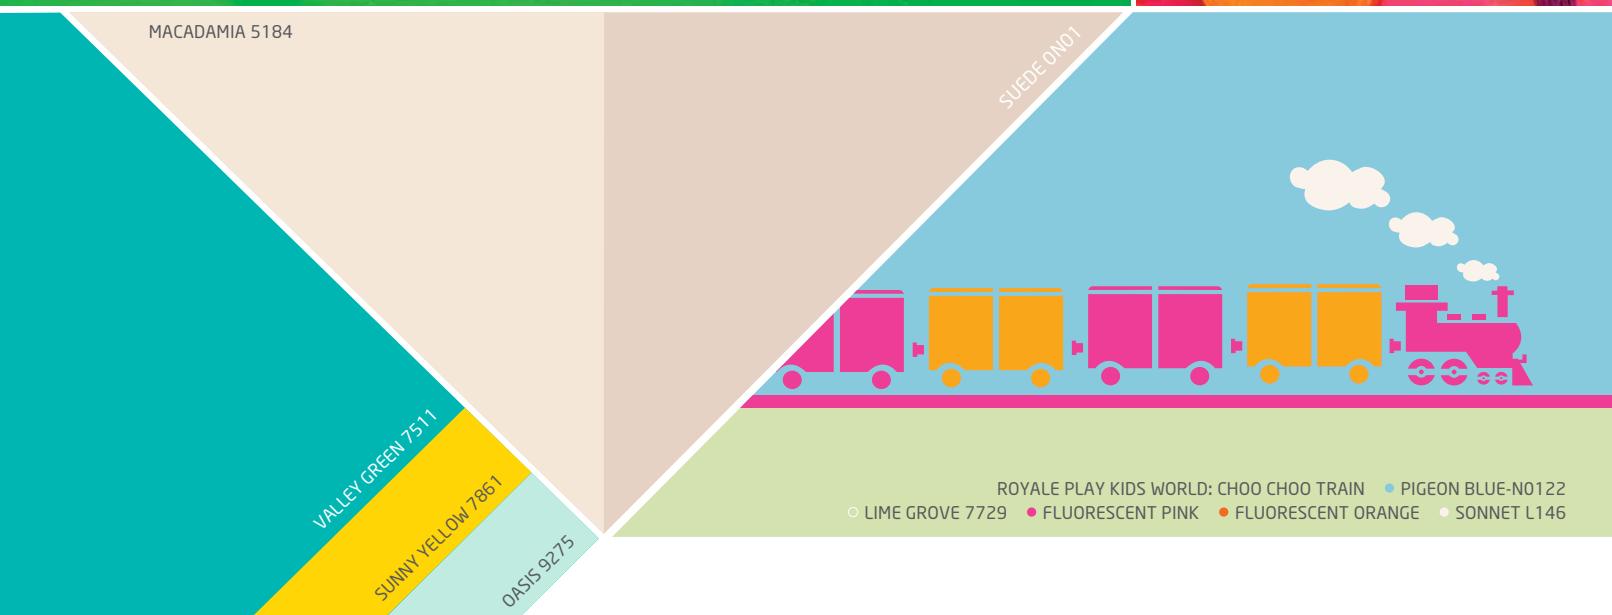

Get inspired by themes

Build a colour palette

Paint your space

THE IMPACT OF COLOUR ON LEARNING: THEME 1

Vivid & Responsive

Small children have a natural preference for '**luminous**' colours such as **lime**, **orange**, **yellow** and **pink**. They work very well in bright, colourful environments. When children are very young, they use

colour and shape to identify things, and vivid colours are useful in attracting learners' attentions. The variety reduces boredom and passivity. Bright colours make for bright minds.

THE IMPACT OF COLOUR ON LEARNING: THEME 2

Playful & Energetic

Skillfully combining **primary colours** in classrooms for younger children physically gets them going. Little children are naturally attracted to bright, warm colours. When exposed to **yellows, blues** and

reds, they are more alert and keen to learn. In the right mix, you will find that these colours make for lively, playful and energetic learners.

ROYALE PLAY KIDS WORLD: BIRD TIME STORIES
○ GREEN GLADE 7769 ● FLUORESCENT GREEN ● GREEN SPROUTS 7582 • SUNRISE 0526

THE IMPACT OF COLOUR ON LEARNING: THEME 3

Fresh & Fun

Grouping these **secondary colours** in classrooms helps retain information and encourages participation. **Green** brings calmness, comfort, peace, and hope. It aids communication, and is most restful to

the eye. **Orange** makes learners excited, enthusiastic and energetic. **Violet**, on the other hand, triggers both logic and creativity, and children often do their most interesting work in its presence.

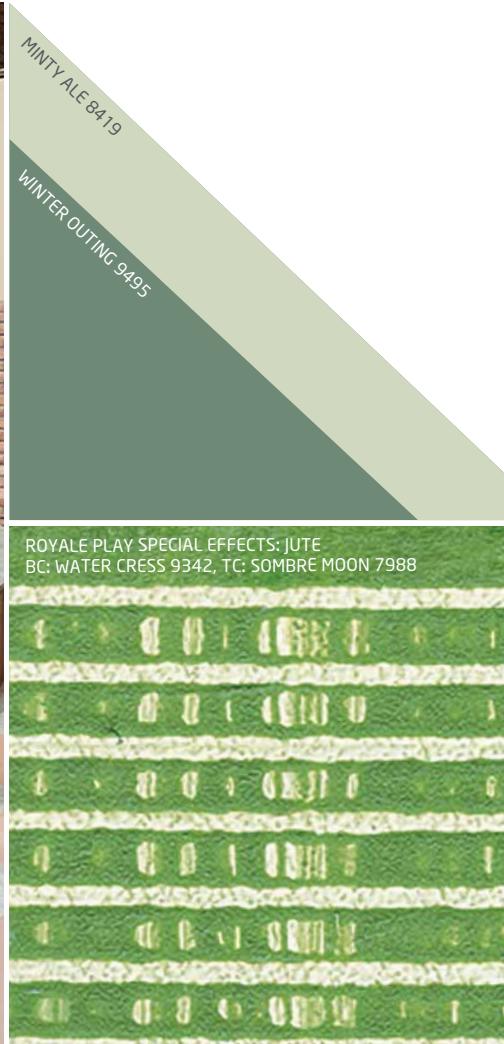

THE IMPACT OF COLOUR ON LEARNING: THEME 4

Earthy & Orderly

Combine **neutrals** and use **mid-tones** to promote cool rational thinking. Mild and mid-toned wall and furniture colours help reduce the contrast between workstations and surroundings. Earthy blends of **rust**,

ochre, olive and **plum** create feelings of dependability, security and stability. These colours reduce distraction and help you think. They encourage children to learn and interact, and work together.

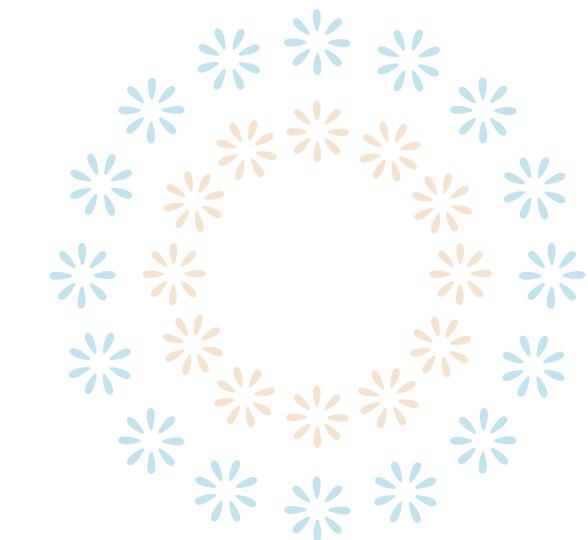

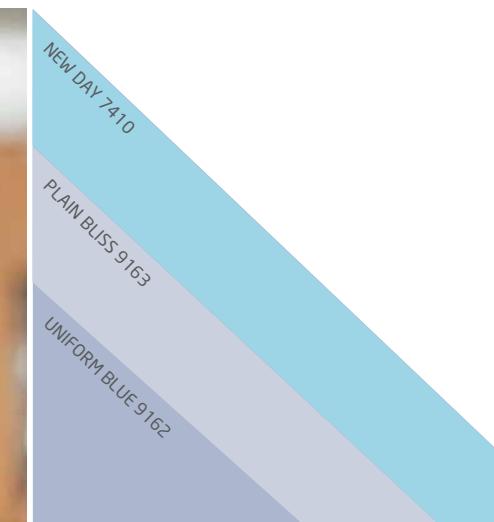

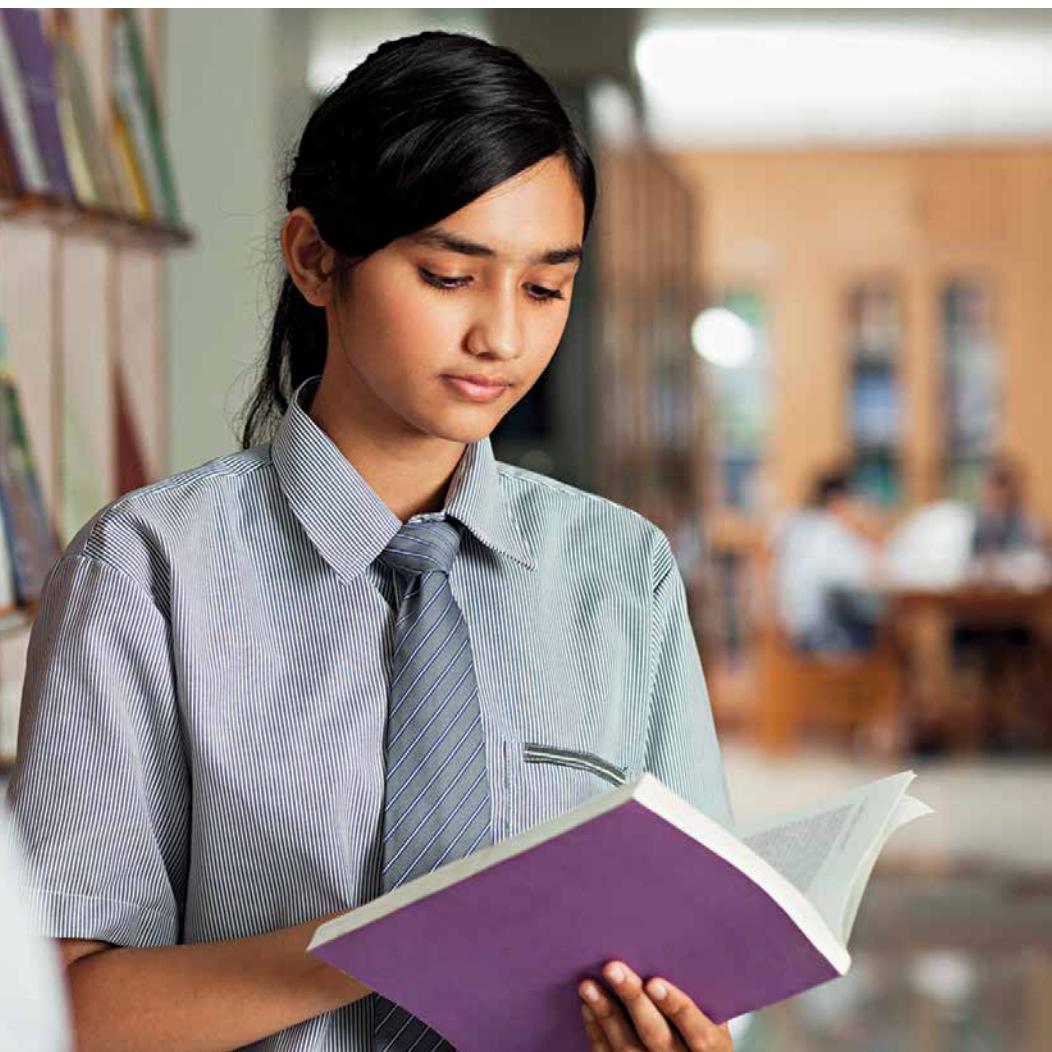

THE IMPACT OF COLOUR ON LEARNING: THEME 5

Calm & Reflective

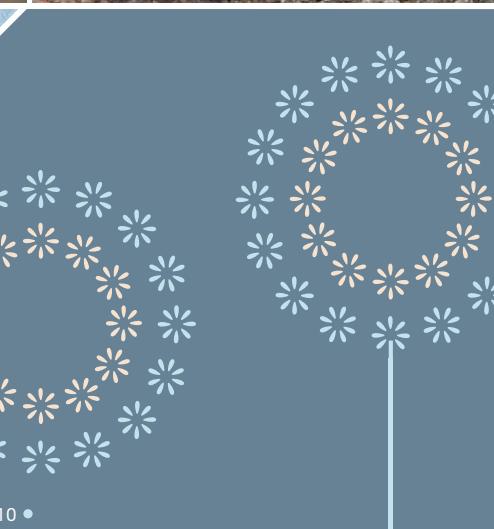

Cool colours are ideal for middle school and high school classrooms because they are relaxing and bring focus. Reading areas are an extension of the classroom, and need to allow learners to reflect. Subtle

colours, such as **light sage greens** and **refreshing blues**, work well for middle and high school learners, because adolescents respond better to shades that are less distracting.

Chapter II

How Colour can be Applied: Ideas and Inspirations

Colour in the learning environment improves visual processing, reduces stress, and challenges brain development through visual stimulation and pattern-seeking. Examine the purpose of the learning environment because this will help guide your colour choices – on walls, on floors, and even on furniture.

From building exteriors, to classrooms, administrative areas, common areas and learning hubs, explore the combinations of themes and moods that result in interesting, exciting, and stimulating spaces. Consider the fresh ideas that have been skilfully brought to life by bringing together textures and trims, accents and stencils.

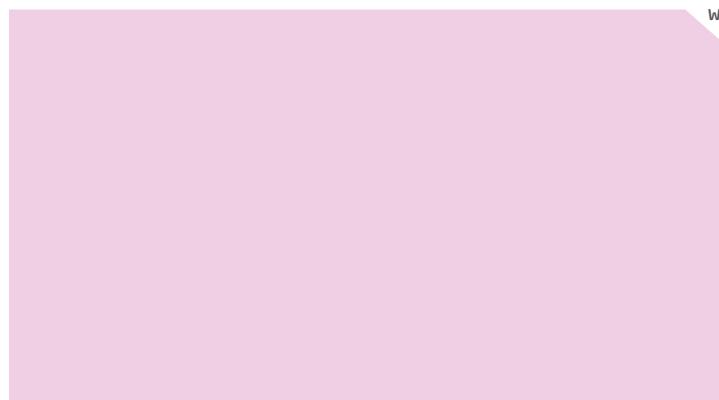

Interiors

CLASSROOMS

Pre-Primary
Primary
Secondary

In this section, we present ideas and inspirations for classroom interiors. From the Pre-Primary section to Primary to Secondary spaces, discover how colours can transform both the modern and traditional classroom set-up. See how colour theory and themes have been combined to create classrooms that are warm, inviting, and conducive to learning.

The first learning environment of a fresh mind, needs to provide a sense of comfort yet stimulating the child to absorb and question the world around her. The *Playful & Energetic* palette finds free rein in the Pre-Primary classroom. Open plans in modern set-ups are well supported by sunny yellows to welcome younger children. Colours from the *Fresh & Fun* range keep energies up. Consider using accents and stencils as an extension of your teaching curriculum. The *Calm & Reflective* spectrum is introduced as a means to combat hyperactivity.

The immediate association with libraries is that of concentration, quiet, and intense focus. Enhance these qualities by choosing colours from the *Calm & Reflective* theme. You can also make your Library inviting and a space where children across ages look forward to visiting, with colours from the *Fresh & Fun* range. Employ colours from the *Vivid & Responsive* series with stencils as focal points to encourage discussion.

Exteriors

FACADES, GATES & GRILLS

The first impression of your learning environment is always the strongest. The facades, gates and grills are the perfect canvas to express what your learning environment stands for – from showcasing a legacy, to highlighting a modern approach to education. In this section, see how colour plays a critical role in setting the right tone for a learning environment.

For the structure that has stood the test of time, reminding everyone of an era gone by, colours can certainly make it connect to the young minds that pass through its corridors. The colours from the *Earthy & Orderly* range reiterate feelings of dependability and strength, while the cool colours from the *Calm & Reflective* theme are relaxing. The friezes, tablets and panels of the traditional, Neo-classical structure can be enlivened with a single colour from the *Vivid & Responsive* series. Extend the palette from the facade into the gates and grills for a homogenous result.

The modern and functional educational structure can derive context and communicate to the world through the colours that it wears. Single shades from the *Vivid & Responsive* series immediately sets the building apart and helps young students identify their environment from a distance. The *Earthy & Orderly* range will provide a sense of security while colours from the *Calm & Reflective* theme brings focus to the young minds. Continue with the colours of the selected theme on to the grills and gates as an extension of your vision.

Contemporary, international structures need to rise above the surrounding buildings and stand out. The architectural highlights of such a structure can be brought out through the *Vivid & Responsive* range. The cool colours from the *Calm & Reflective* theme remind the staff and students to breathe and take in the surroundings and the *Earthy & Orderly* theme brings in a sense of harmony and stability. Use the chosen theme on the gates and grills for a well-put-together look.

Chapter III

Get Started with your Painting Project

Asian Paints caters to the retail and large-scale businesses through our wide range of products and services. Interact with our consultants for recommendations on products and tools. Review key features

and benefits of the products that suit your specific requirements. From selection to application to maintenance, let us help you arrive at the best possible solution for your learning environment.

Asian Paints Services

FOR ARCHITECTS AND INTERIOR DESIGNERS

Relationship Officer

Connect with our Relationship Officer for information on products, tools and services.

Shade Guide

Browse through shade cards, product catalogues, colour guides, and in-house magazines.

Technical Assistance

Get on-site technical assistance for an expert view on surfaces and products that suit you.

4 Pics

Get door delivery of printouts of your space in 4 colour combination options, and then decide.

Swatches

Choose from 1800 colours or a range of textures on large swatches that are door-delivered.

Colour Consultancy

Consult with Colour-Assist personnel to help you choose the themes that fit your needs.

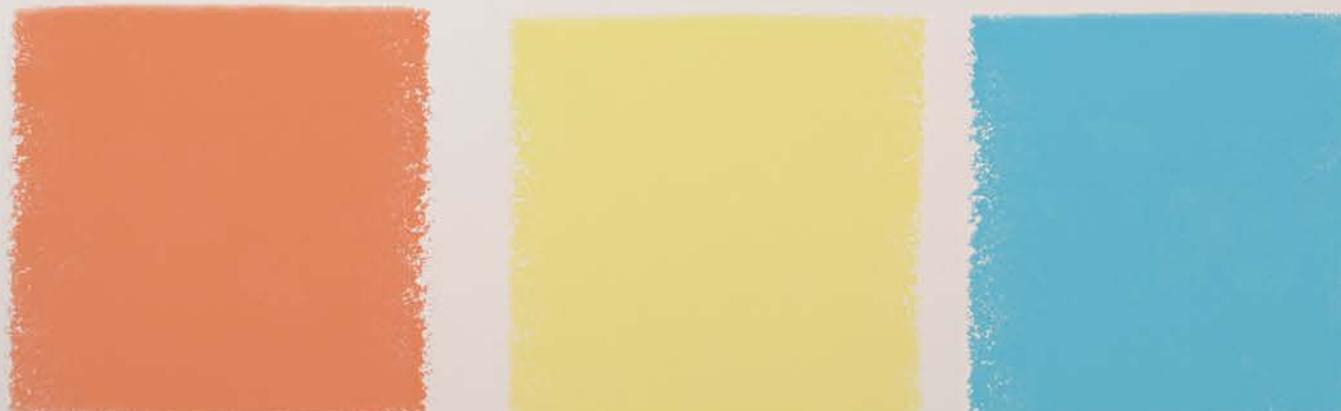

PROJECT SALES

FOR LARGE-SCALE PROJECTS

The Asian Paints Project Sales division was specially created to provide assistance in decision making and execution for large scale projects.

The division offers, customized guidance and expert access throughout the process. Finalizing the right painting process, expert technical evaluation of the surface and recommendations

by highly trained and experienced personnel, are some of the few but critical services that are provided by our team.

The Painting Process

Asian Paints offers assistance and unmatched services for every stage of the painting process. We are on hand to suggest the most effective and efficient ways for the actual execution of your project, including consultations on post-painting care, and how best to maintain your learning environment.

Stage 1: Pre-Painting

SITE INSPECTION

By Trained Technologists

CHOOSE COLOURS

With our Colour Consultants

SELECT PRODUCTS

From an Exhaustive Range

Pre-painting consists of actually measuring the surfaces to be painted, identifying and correcting problem areas, and selecting the themes and products for your learning environment. Discover the range of services that helps realise your vision.

Stage 2: Painting

SURFACE PREPARATION AND PAINTING

Under Expert Guidance

Understand the painting process and get tips for the best results.

From surface preparation to paint application, we provide you a clearly defined, no-surprises process for the efficient execution of the entire project.

Stage 3: Post-Painting

SITE COMPLETION

With Performance Warranty

Post-painting care and maintenance is an important aspect of this process.

Asian Paints Apex Ultima and Asian Paints Apex Ultima Protek come with a written warranty ensuring your learning environment remains a landmark for years.

Surface Defects

BLISTERING

Blistering occurs from high moisture content in walls, when water trying to escape from the surface collects between the substrate and the paint film. Low quality primers or not allowing enough drying time could be other probable causes.

CRACKS

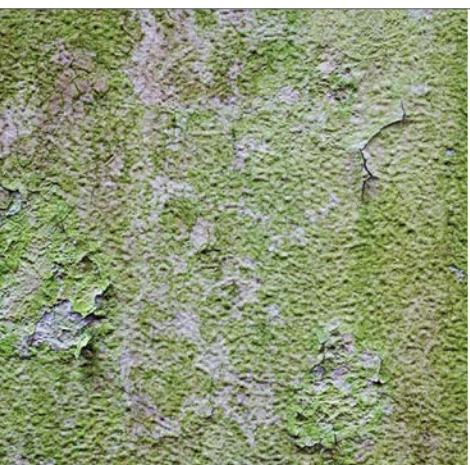

Building walls may develop cracks which could over a period of time, expand and weaken the structure. These cracks also collect moisture and become breeding areas for algae and unwanted weeds.

PEELING

Poor adhesion can result in a loss of paint from the surface or wall in the absence of a primer, or if a low quality primer is used. Asian Paints top coats perform best with Asian Paints primers.

CHALKING

Paint comes off in powdery layers when applied on applied on porous surfaces without an intermediary layer of good quality primer. This is called chalking. Using a good quality primer at the initial painting stage reduces the chances of chalking.

COLOUR FADING

Over time, the original wall colour fades. This is caused by the high alkalinity of the wall, which occurs in new constructions. Water curing is one way of reducing the alkalinity. The other solution is to use exterior sealer and then use a higher grade emulsion in the affected areas.

ALGAE

Algal growth occurs on walls that are damp, dusty and exposed to sunlight. Not only does it spoil the look of the wall, but it also causes the paint film to weaken and peel off. If left unchecked they can also damage the wall surface.

DAMPNESS

Damp spots are usually caused by water leaking from drain pipes, incorrectly-placed AC ducts and rainwater. Resolve dampness before painting to avoid flaking/ peeling. Leaking pipes, badly-fitted tiles, faulty plumbing and rainwater seepage can result in dampness.

Application Procedures

INTERIORS

Repainting

Step 1

Scrape the existing coat of paint completely.

Step 2

Apply one coat of Asian Paints Decoprime Primer (WT/ ST).

Step 3

Apply 2-3 coats of Asian Paints Interior Emulsion.

Fresh Painting

Step 1

Scrape the existing coat of paint completely.

Step 2

Apply one coat of Asian Paints Decoprime Primer (WT/ ST).

Step 3

Apply 2 coats of Asian Paints Acrylic Wall Putty.

Step 4

Apply one coat of Asian Paints Decoprime Primer (WT/ ST).

Step 5

Apply 2-3 coats of Asian Paints Interior Emulsion.

EXTERIORS

Repainting

Step 1

Scrape the existing coat of paint completely. Use a wire brush to scrape algae off the surface.

Step 2

Apply one coat of Asian Metal Primer Red Oxide.

Step 3

Apply one to two coats of Asian Paints Apcolite Premium Enamel – Gloss/ Satin or Royale Luxury Enamel.

Fresh Painting

Step 1

Scrape the existing coat of paint completely. Use a wire brush to scrape algae off the surface.

Step 2

Apply one coat of Smartcare Bioblock followed by one or two coats of Asian Paints Wall Putty.

Step 3

Apply one coat of Asian Paints Exterior Primer.

Step 4

Apply 2-3 coats of Asian Paints Exterior Emulsion.

METAL

Step 1

Scrape the existing paint from the metal surface.

Step 2

Apply one coat of Asian Metal Primer Red Oxide.

Step 3

Apply one to two coats of Asian Paints Apcolite Premium Enamel – Gloss/ Satin or Royale Luxury Enamel.

Step 4

Apply one coat of product sealer (Melamine, PU, etc.) and apply Asian Paints Wood stain (solvent-based or water-based).

WOOD

Step 1

Sand the surface well to remove the existing coat, and remove dust and dirt.

Step 2

Apply one coat of product sealer (Melamine, PU, etc.) and apply Asian Paints Wood stain (solvent-based or water-based).

Step 3

Apply one coat of product sealer (Melamine, PU, etc.).

Step 4

Apply 2-3 coats (as required) of top coat wood finish.

Green Assurance

Volatile Organic Compounds (VOCs)

VOCs are organic chemicals used in the manufacture and maintenance of paint, building material, interior furnishing, cleaning products and personal care products. Being 'organic,' VOCs are essentially carbon-based, but they include elements with very low boiling points. VOCs can evaporate or mix with air at room temperature during the paint and drying process, which makes it volatile. Small quantities are used in paints to enhance their functional and aesthetic appeal.

Low-VOC Products

Sustainability and the environment are important to Asian Paints. We have developed a range of green, low VOC products.

Exterior Emulsions	Apex Ultima Protek, Apex Ultima, Ace Emulsion, Apex Exterior Emulsion
Interior Emulsions	Royale Aspira, Royale Shyne, Royale Luxury Emulsion, Premium Emulsion, Tractor Emulsion
Professional Range	Premium Interior Emulsion, Premium Exterior Emulsion, Acrylic Distemper, Exterior Wall Primer, Primer Water Thinnable
Distempers	Tractor Acrylic Distemper, Tractor Synthetic Distemper, Tractor UNO
Exterior Textures	Apex Duracast Venezio, Apex Duracast FineTex, Apex Duracast RoughTex, Apex Duracast SwirlTex, Apex Duracast DholpurTex, Apex Duracast CrossTex, Apex Duracast PebbleTex
SmartCare	Damp Block, Damp Proof, Crack Seal
Undercoats	Asian Acrylic Wall Putty, Asian Wall Putty, Exterior Wall Primer, Decoprime Wall Primer Water Thinnable, SmartCare Exterior Sealer, SmartCare Primero

In design, construction and maintenance, Green Buildings are structures that are environmentally responsible and resource-efficient throughout their life-cycles.

The benefits to the environment and businesses are many:

Environmental	Superior air quality, abundant natural light noise filtering, energy efficient/ renewable source recycling of materials, water conservation
Organisational	Lower operating costs, reduced utility costs higher market value

Interiors Products Range

Wall Finish

Apcolite Advanced Emulsion

- ✓ Advanced stain guard removes stains easily
- ✓ 2X film strength for higher durability
- ✓ Hides surface undulations with matt finish
- ✓ Anti-burnishing property ensures no cleaning marks post wall cleaning

Royale Luxury Emulsion

- ✓ Carries Green Assure mark and is environmentally safe
- ✓ Teflon surface protection for excellent stain removal and durability
- ✓ Available in multiple finishes: Sheen, Eggshell, Matt
- ✓ Anti-fungal and anti-bacterial

Metal Finish

Apcolite Premium Enamel - Satin/ Gloss

- ✓ Excellent washability
- ✓ Tough and durable finish
- ✓ Available in a wide range of colours
- ✓ Anti-fungal

Royale Enamel

- ✓ Green Assure mark and EN-71 compliant
- ✓ Non-yellowing and anti-fungal
- ✓ Excellent washability (1 lakh wash cycles) and high gloss finish
- ✓ Odourless and faster drying for hassle-free painting experience

Wall Texture

Royale Play

- ✓ Excellent abrasion resistance
- ✓ Translucent and odourless
- ✓ Non-toxic and non-flammable
- ✓ Soft sheen that lends elegance and style to the surface

Royale Play Stucco

- ✓ Provides eggshell-to-glossy finishes
- ✓ Non-toxic and non-flammable
- ✓ Environmentally friendly

SmartCare

Damp Block

- ✓ Flexible, polymer modified cementitious waterproof coating
- ✓ Easy application
- ✓ Provides waterproofing to walls adjacent to bathrooms, kitchens and exterior facing walls
- ✓ Protection from efflorescence and salts

High Performance Yellow Metal Primer

- ✓ Excellent rust protection
- ✓ Now easily available and useful
- ✓ Retains the beauty of metal surfaces
- ✓ Zinc phosphate is safer than zinc chromate primers

Wood Finish

Woodtech Melamine

- ✓ Lasts twice as long as local French polish
- ✓ Good gloss retention
- ✓ Protection from daily wear and tear
- ✓ Moderate scratch, stain and heat resistance
- ✓ Clear finish for natural woods and veneers

Woodtech PU

- ✓ Excellent resistance to scratching
- ✓ Excellent stain resistance
- ✓ Excellent non-yellowing property
- ✓ Retains natural beauty for years

UniverSeal Sealant

- ✓ Non-corrosive on metals with good adhesion on walls
- ✓ Flexible enough to withstand joint movements
- ✓ Odourless
- ✓ Waterproofs joints, Anti-fungal & UV stable

AkrylMax Sealant

- ✓ Seals joints that need to be painted – around door/ window frames, switch boards, between gypsum boards
- ✓ Provides waterproofing
- ✓ Flexible

Tile Range

- ✓ Prevents water entering from tile joints
- ✓ Usable for fresh tiles & existing tiles
- ✓ Household cleaner resistant
- ✓ Available in 7 beautiful colours

Exteriors Products Range

Wall Finish

Apex Weather Proof

- ✓ Protection against UV
- ✓ Excellent anti-algal performance
- ✓ Weather guard
- ✓ Wide shade range

Apex Ultima

- ✓ Colour Stay™ technology
- ✓ Advanced anti-algal formula
- ✓ Excellent dust pick-up resistance
- ✓ Walls look shiny and rich
- ✓ 7 year performance warranty

Wall Texture

Duracast CrossTex

- ✓ Clean finish pattern
- ✓ Tough texture finish
- ✓ Protection from wind-driven rain
- ✓ Low maintenance
- ✓ Hides surface undulations and fine cracks

Duracast DholpurTex

- ✓ A 1-1.5mm thick intermediate coat
- ✓ Offers a classic, rugged look
- ✓ Gives walls a distinctly premium and upmarket finish
- ✓ Versatile texture offers a wide range of finishes

Metal Finish

Royale Luxury Enamel

- ✓ Excellent anti-yellowing property
- ✓ Excellent scrub resistance
- ✓ Extremely flexible and low odour
- ✓ Comes with green assurance
- ✓ Excellent stain resistance with anti-fungal property

Apcolite Premium Enamel - Satin/ Gloss

- ✓ Excellent washability
- ✓ Tough and durable finish
- ✓ Anti-fungal
- ✓ Available in wide range of colours

Wood Finish

Woodtech PU Luxury

- ✓ Two component polyurethane system for exterior wooden surface
- ✓ Provides good weather resistance
- ✓ Best-in-class light fastening property
- ✓ Preserves natural beauty of wood for years

Aquadur PU Luxury Aqua

- ✓ Superior protection
- ✓ Excellent weather resistance
- ✓ Excellent light fastening properties
- ✓ Extremely easy application

Smartcare

Damp Proof

- ✓ Complete terrace waterproofing solution
- ✓ Resists positive hydrostatic pressure of up to 7 bars
- ✓ Excellent mechanical strength for foot traffic
- ✓ 0.8mm crack bridging ability
- ✓ Excellent anti-carbonation performance improving building durability

Crack Seal

- ✓ Waterproofs the crack
- ✓ Single pack, ready-to-use product
- ✓ Crack-bridging ability upto 3mm, for plaster cracks
- ✓ Reinforced with glass fibres, providing mechanical strength for better adhesion

Colour Resources

Asian Paints colour tools, available in print and digital mediums, provides designers with assistance in the selection of colour palettes for a variety of spaces.

COLOUR SPECTRA FANDECK

The Asian Paints Colour Spectra has 1800 original hues classified into pastels, melange and accents. These paint deposits are arranged to help you select colours from light to dark tones.

COLOUR SPECTRA PRO

View 1800 colours in large 3x5 inch paint swatches that have been systematically arranged into 6 decks. Organised by colour family, and indexed by name and number, this fandeck is a designer's delight.

COLOUR SCHEME PRO APP

A mobile phone application available on Android and iOS platforms that allows you to select colours with a touch. Browse through the entire Colour Spectra Fandeck, build colour schemes, view and share.

Explore articles, opinions, expert-speak and inspirational colour stories that will trigger thought and unleash your imagination.

COLOUR CODE

Find motivation in a set of custom-developed decks with fabulous images from which to assemble creative palettes and colour schemes.

COLOUR QUOTIENT MAGAZINE

The Asian Paints quarterly publication is a curated collection of the latest insights, innovations and ideas from the world of colour.

INSPIRED INTERIORS

Delve into colour essentials through a lookbook focused on colour and mood. Develop your own customised textures and create a unique palette with our interactive colour/ texture-matching tools.

IMAGINE EXTERIORS SKYLINE

A guide to colour selection for high-rise buildings that also allows you to create your own combinations and information on exterior paint products.
